

Pre-Institute Session

Developing and Utilizing Your Community Assessment Sunday, September 29, 2013

Dr. Charlotte Hendricks will present this full-day, hands-on workshop on Community Assessments. During the workshop, you will walk through the steps to revitalize your Community Assessment process, integrate strategic planning, and increase competitiveness for funding.

In the morning session, you will identify relevant questions and data to meet Head Start and other funding requirements and to enhance strategic planning. Explore ways to involve staff, families, and community members, and collaborate with other programs and agencies. You will identify criteria for your work plan, and design cost-effective methods to survey clients, utilize focus groups, and identify resources.

In the afternoon, you will identify challenges, explore practical and cost-effective solutions to data collection, and learn to interpret and categorize data. You are encouraged to bring a laptop, notebook, iPad, or other wireless device to explore online databases.

During this workshop, Dr. Hendricks will address questions that have been submitted in advance, as well as those that arise during the workshop. Please forward any questions or comments to chendricks@childhealthonline.org

To register, visit the NHSA website at www.nhsa.org/events

Date: Sunday, September 29, 2013
